Energy efficient lighting systems

Lighting accounts for up to 40 % of the energy costs in most office buildings, schools and commercial buildings. It is most likely supplied by electrical power plants using fossil fuels, and is responsible for a significant percentage of carbon dioxide emissions, a leading cause of global climate change. Nowadays there is a global movement to develop and implement lighting solutions that meet the needs and concerns of our clients, and address environmental regulations. Tebodin Netherlands B.V. and Workfusion B.V. created an cooperation to serve our clients as one partner.

Workfusion

Workfusion B.V. is specialized in consulting, selling and installing sustainable lighting products. Within this expertise Workfusion can provide the following services:

- Financial advice on tax credit for environment-related investments;
- Advice and assistance on subsidies;
- Conversion of T8 lighting systems to T5 lighting systems;
- Coordination of installation works for T8-T5 conversion and BB-Lightconcepts®.

BB-Lightconcepts®

Workfusion B.V. is official dealer of BB-Lightconcepts®. BB-Lightconcepts is a company that developed the LED-Lightpipe® which:

- Is specially developed for use in existing installations;
- Standard has DALI (Digital Addressable Lighting Interface);
- Requires little maintenance;
- Is Cradle to Cradle certified

Uw Partner in Energiezuinige Toepassingen

'Full service for your sustainable lighting solutions'

Tebodin

Tebodin, being the competence center for sustainable lighting systems, can provide the following services:

- Lighting studies;
- Engineering of illumination plans, electrical installations and HVAC-systems;
- Calculation of energy savings due to the use of different lighting types;
- Calculation of the impact of lighting systems on HVAC systems;
- Energy-scans for industrial as well as commercial buildings.

One partner, complete service

Due to the cooperation of Workfusion B.V. and Tebodien we can offer you one partner for your questions on sustainable lighting systems. The complete process from lighting studies to installation works can be delivered as one service!
